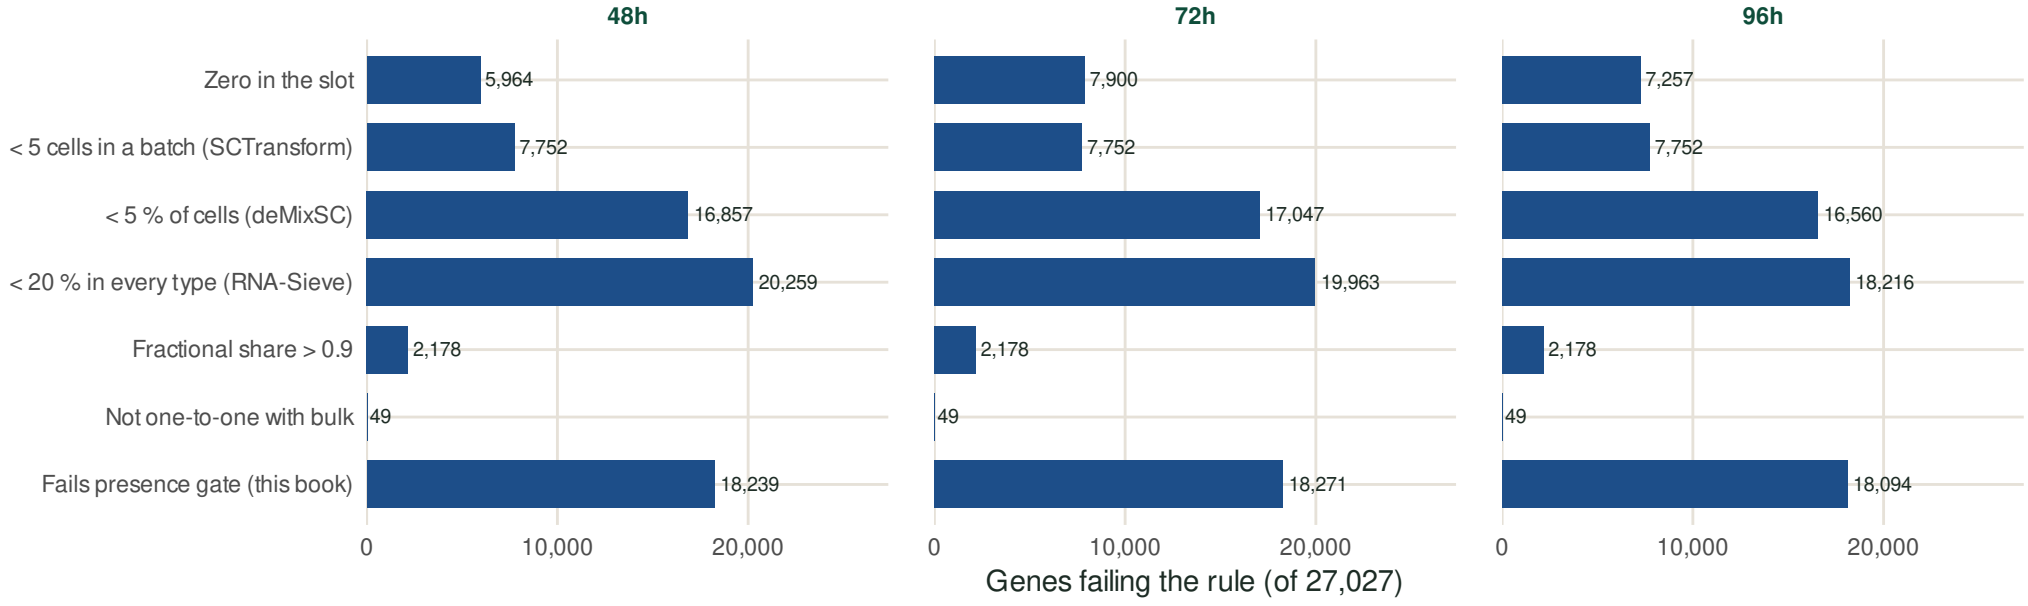
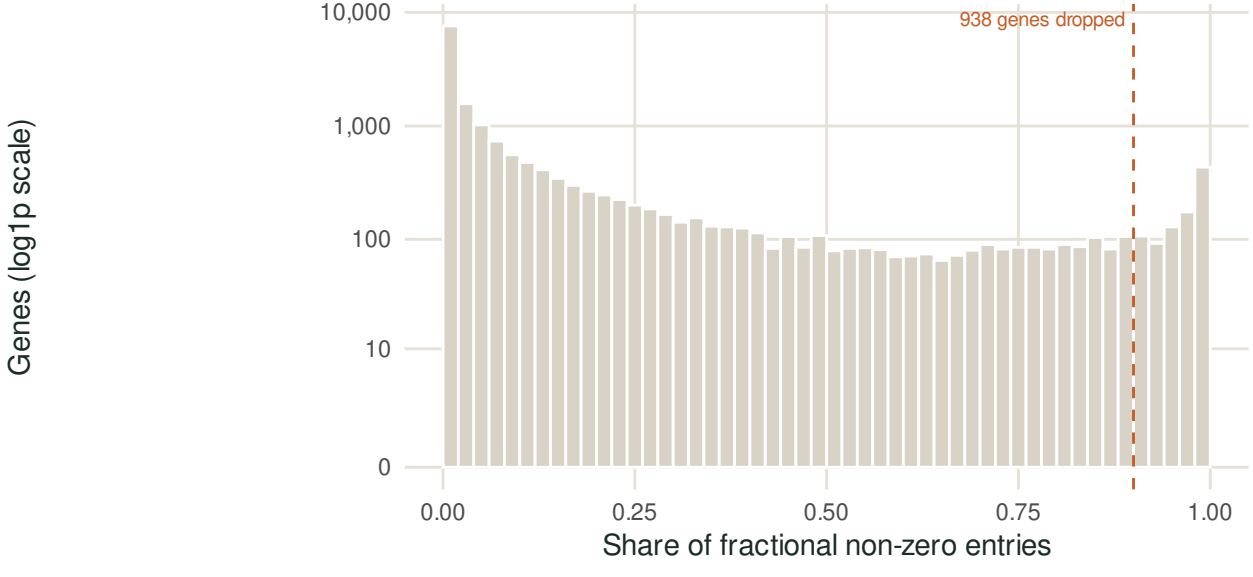
a. Most genes are removed for low detection: 18,094 to 18,271 fail the presence gate

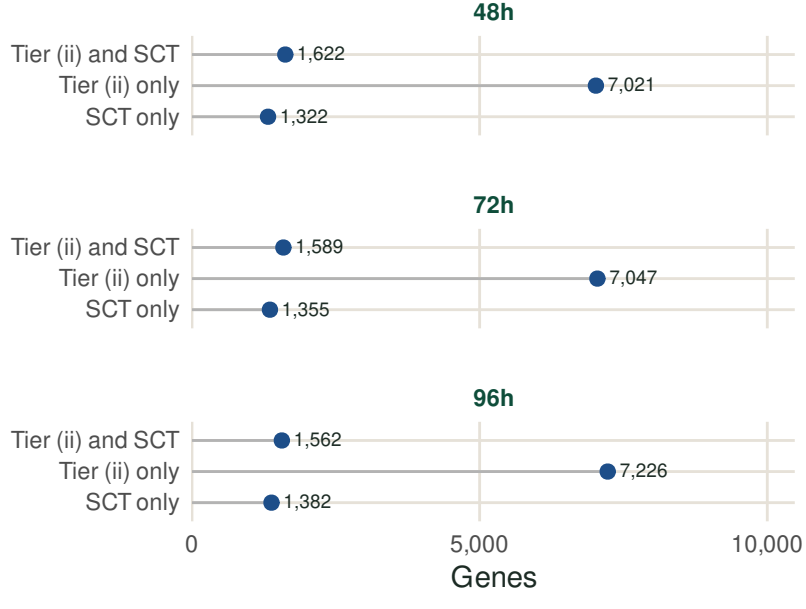
Rules in the order of the pipeline, top to bottom; a gene can fail several rules



b. 938 well-detected genes are mostly fractional counts

18,083 genes detected in >= 50 cells; bins of 0.02. Panel a counts the rule on all genes





c. 1,562 to 1,622 of the 2,944 SCT genes enter tier (ii)
