a. 418 kept cells lie beyond 3 MAD of their type's library size (circled)

67 kept cells count fewer than 1,800 genes on the deposited matrix (genes removed after the authors' QC)

b. Median library sizes of the types span only 7,856 to 20,242 counts

Types ranked by median, n = cells; point: median; bar: median +- 3 MAD (log10 scale)
