48h PCA

PC1 + PC2: 3.0 % of the residual variance

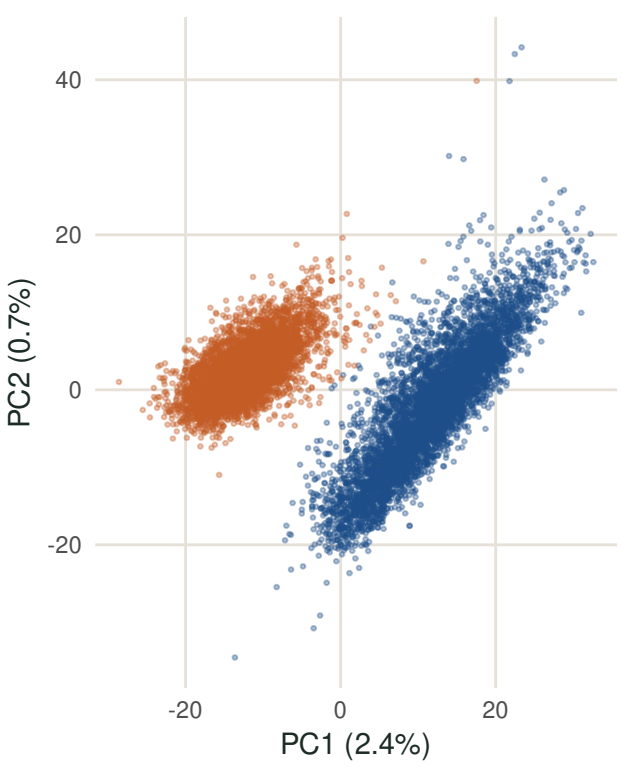

48h PLS-DA

Two components fitted to separate the types

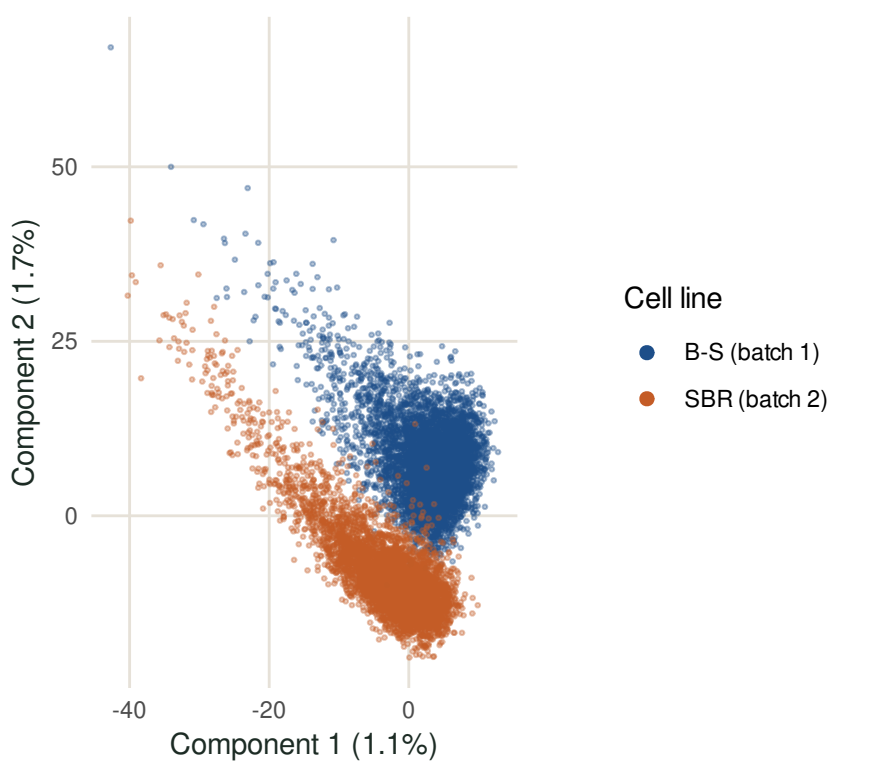

48h PCA: PC1 splits the cell lines

PC1 > 0: 97 % of B-S, 1 % of SBR cells

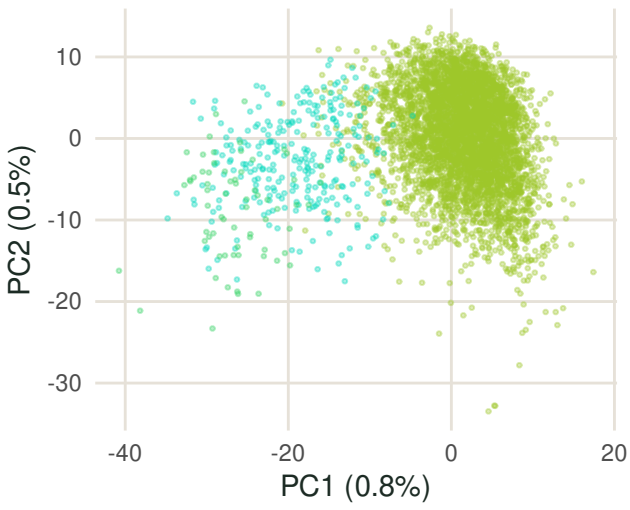

48h PLS-DA also splits the lines

Fitted on the types; coloured by cell line

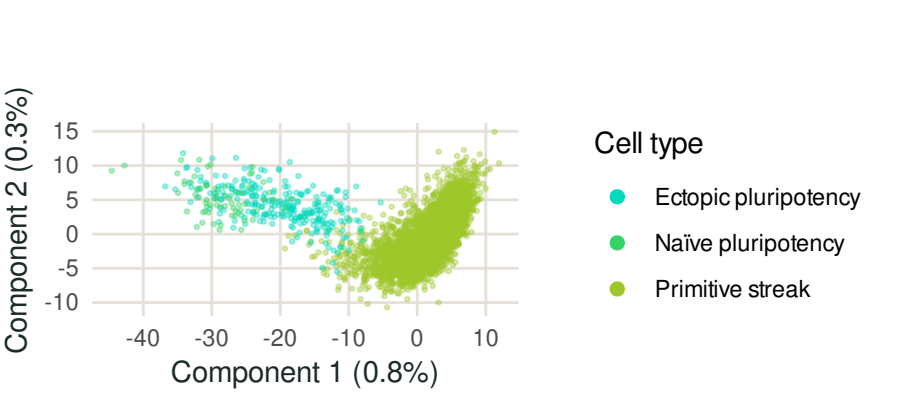

72h PCA

PC1 + PC2: 1.3 % of the residual variance

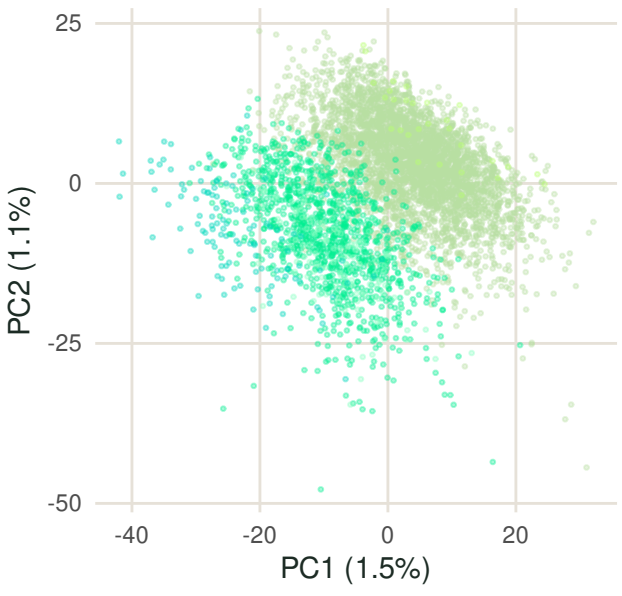

72h PLS-DA

Two components fitted to separate the types

96h PCA

PC1 + PC2: 2.6 % of the residual variance

96h PLS-DA

Two components fitted to separate the types
