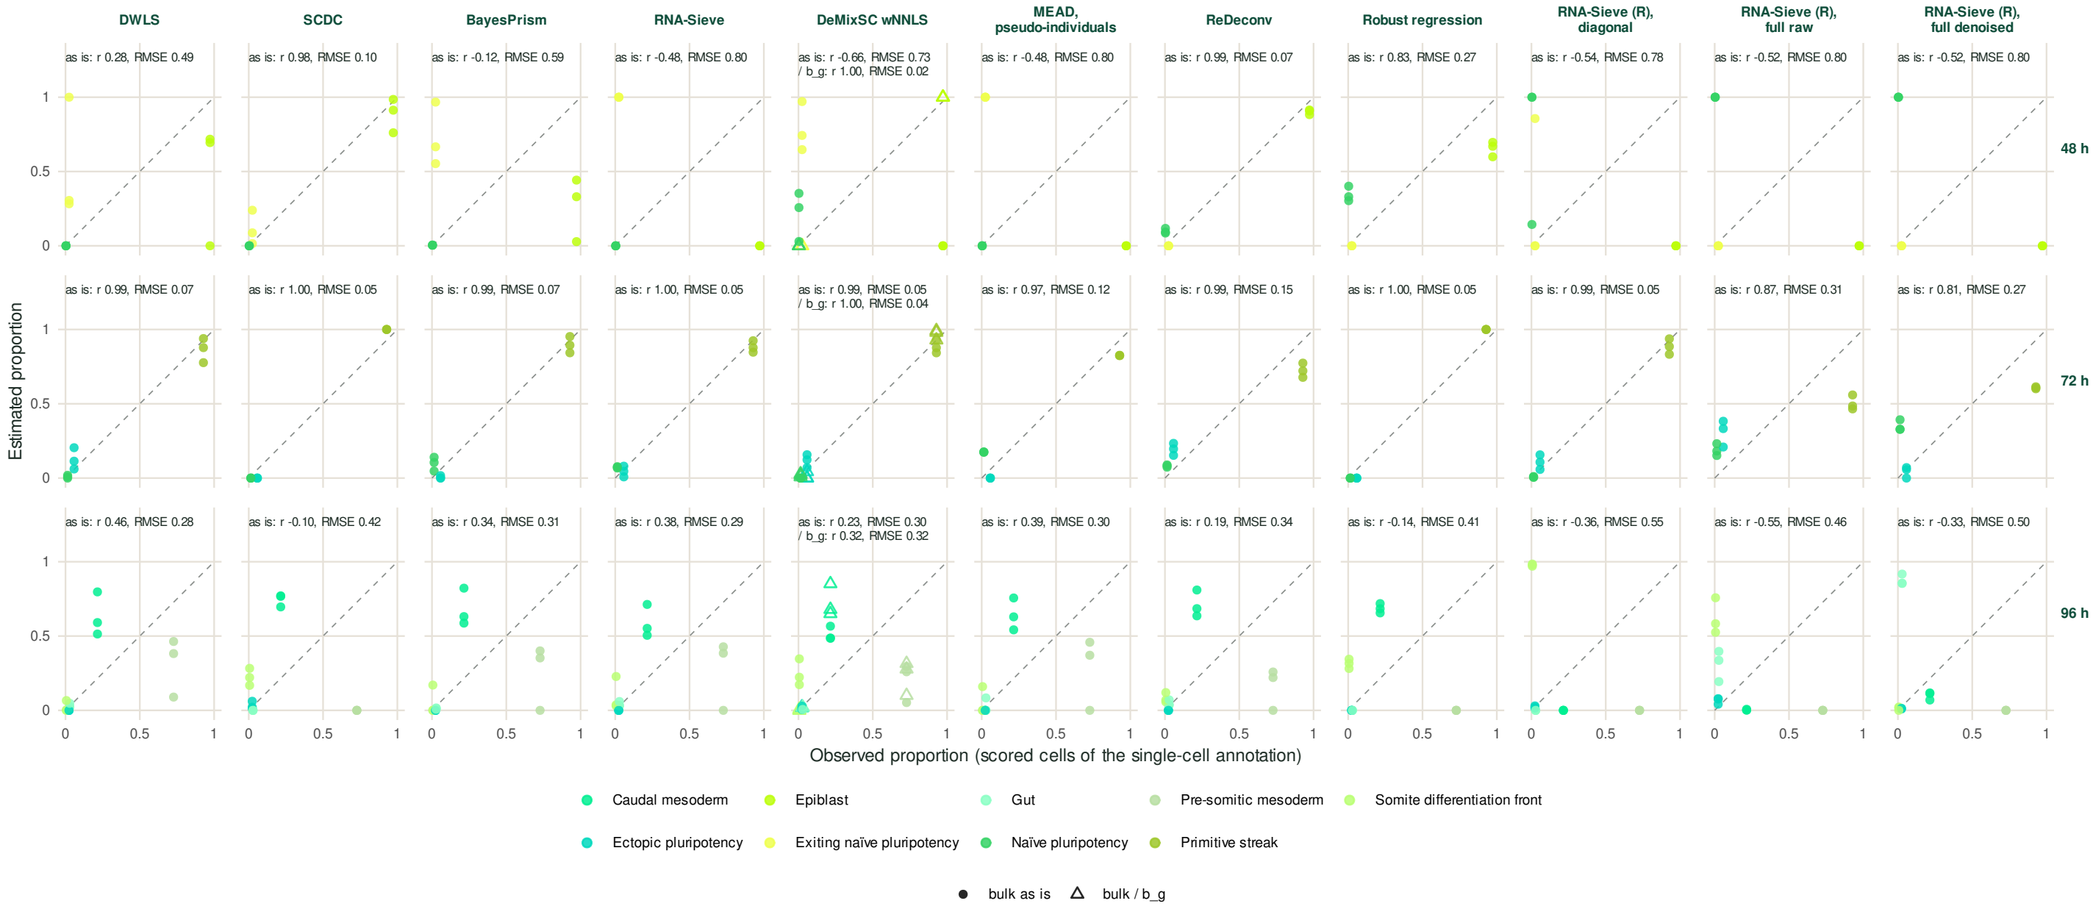
Lowest RMSE over the three times: 0.22 (DeMixSC wNNLS + b_g) among comparators, 0.14 (raw, L-BFGS-B, bulk / b_g) for DeCovarT


Panel: genes with a deviance share of at least 5%. Standard-Wnt bulk replicates, one point per cell type and replicate. Above each panel: Pearson r and RMSE. RNA-Sieve (R): stage with refined means and gene variances.
